Heating cabinet

In Resistances Tope we manufacture custom hot chambers for industrial drums and tanks. If our range of standard chambers doesn't fit your needs, we can manufacture it for you customized.

Capacity: From 4 to 48 drums of de 200 lt/ From 1 to 12 IBC tanks.
Temperature from +5° C to +150° C

Our hot chambers demands less power in order to keep the temperature due to a precise control of the temperature. Also because of the fully separation between the inside and the outside of the chamber that allows an excellent insulation of the internal circuit the temperature losses are almost totally minimized.

All our hot chambers are provided with:

• Front control panel with digital temperature controller to facilitate the access to basic safety measures and regulation

• Digital temperature limiter.

• Anti-trapping system (doors can be opened from inside).

• Electric fan overload alarm.

• Proximity sensor to turn off the heating when the doors are open.

• Stainless steel housing.

• Internal volume washing system: available in manual or automatic operation??

• Sistema de lavado de volumen interno: disponible en funcionamiento manual o automático.??
